

2023 Membership Brochure

Mission

Our mission is to enhance and secure participant outcomes through education, research and advocacy on the benefits of private equity, hedge funds, and other alternative assets within a defined contribution framework.

Enhancing Retirement Security

The benefits to defined contribution (DC) participants are clear: the inclusion of a modest allocation of diversified, professionally managed alternative assets within a multi-asset portfolio, such as a target date suite or balanced fund, will likely enhance their retirement security. We are dedicated to finding solutions to help overcome market bias and operational impediments that may limit the use of alternative investments within DC plans.

Achieving our Mission

Through education, research, and advocacy, we work to:

- Overcome the operational, educational and regulatory impediments that have limited the uptake of alternative investments in DC plans
- Provide balanced information to educate the DC plan community, regulators and legislators on the benefits of including alternative investments in DC plans without bias for any product or solution
- Conduct research that measures the impact of alternative investments on long term portfolios and investment structures, and how they can best be utilized in DC plans
- Present a collective industry perspective to advocate for prudent modernization of the laws and regulations that can enhance participant outcomes through the inclusion of alternative assets in DC plans
